"I love the fact my bakery is being powered by the sun, and the savings Repower Shoalhaven modelled, was just a bonus!" – Jelle, Owner

CASE STUDY #2

SHOALHAVEN HEADS BOWLING CLUB

- Installed: July 2014
- System Size: 99 kW
- Capital raised from RS Members: 80%
- Time taken to raise capital: 11 days
- Estimated savings for the club: \$400,000 (lifetime)
- Estimated investor return: 7.86 % p.a.

"Repower have over delivered, not only on the estimates given, but have ensured the process from construction to accountancy has been completely professional. The fact Repower is community based, with investors having a priority to sustainable energy makes the relationship with a Community Club a perfect fit." – Mick, General Manager

THREE SIMPLE STEPS FOR YOUR BUSINESS

STEP 1 Contact Repower Shoalhaven to see if your business is suitable.

STEP 2 Show us some power bills. We'll crunch the numbers and present you with some tailored options.

STEP 3 We sign an agreement which specifies the solar electricity price, contract length, and other important details. Once it's up, we bill you quarterly like a regular power bill for all generation that comes from the system. We monitor and maintain your system for free until the end of the term.

HOW OUR COMMUNITY SOLAR MODEL WORKS

1. The community funds, installs, owns and operates a solar power system on your roof (coordinated by Repower).

2. You buy the solar generation (commonly at a rate cheaper than your grid price) during the contract period.

3. There are no worries from your end – if it doesn't generate, you don't pay!

4. You are gifted the system at the end of the contract, getting free energy from sun for many years to come.

**Solar without the capital cost, debt, risk or hassle!
Community members receive a good return on their investment.**

IT'S A TRUE WIN-WIN!

BENEFITS TO YOUR BUSINESS

- ✓ No upfront cost & no debt.
- ✓ Power price certainty & potential bill savings.
- ✓ Electricity payments are 100% tax deductible (if eligible).
- ✓ No risk. If it doesn't work you don't pay.
- ✓ We do everything - install, fund, monitor and maintain.
- ✓ Flexibility. End the contract early if you need to.
- ✓ Great publicity and PR for your organisation.
- ✓ Connects you with the community.
- ✓ Lower your environmental impact.

BENEFITS TO YOUR COMMUNITY

- ✓ Great for the local economy. Money stays within the community.
- ✓ The sustainability 'multiplier effect'. Your lead will inspire similar projects.
- ✓ Renters and apartment dwellers can access solar ownership.
- ✓ Everyday people can invest in their community and in a more sustainable future.
- ✓ Helps us create a cleaner, more equitable energy system.
- ✓ Supports an innovative local solution to global warming.
